

EDGEWOOD AVENUE AND MCFARLAND ROAD INTERSECTION IMPROVEMENTS

PROJECT SCOPE

In 2007, the Indianapolis Department of Public Works (DPW) estimated that 9,760 vehicles per day travel on Edgewood Avenue. Similarly, in 2007, approximately 9,609 per day travel on McFarland Road, and much of that traffic travels through the intersection of those two streets.

By 2027, travel on both streets is expected increase to more than 14,000 vehicles per day due to increased residential and commercial development in the area.

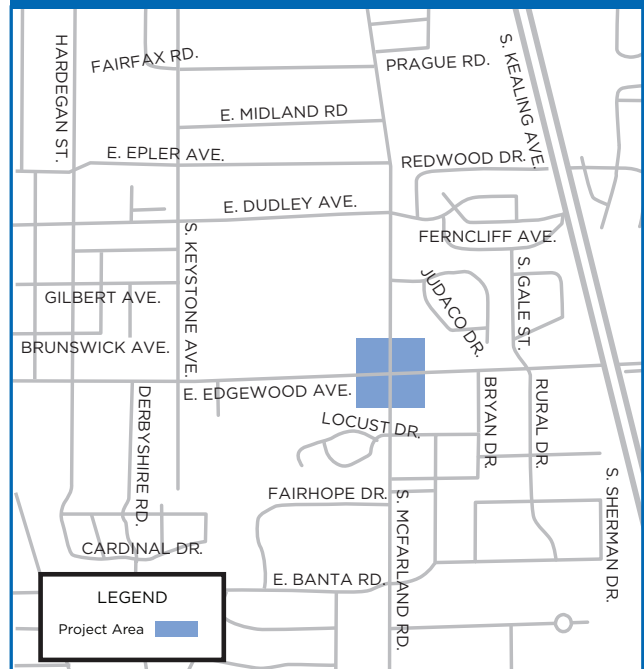

As a result, DPW completed intersection improvements to increase capacity, reduce traffic delays and improve safety.

Improvements to the Edgewood Avenue and McFarland Road intersection include installation of a round-about.

Pavement markings and drainage improvements were also incorporated.

Concrete sidewalks along one side of the road way in each direction were constructed as well.

EDGEWOOD AVENUE AND MCFARLAND ROAD INTERSECTION IMPROVEMENTS

PROJECT DETAILS

PROJECT STATUS: In Construction

ANTICIPATED CONSTRUCTION PERIOD: July to September 2014

DESIGN ENGINEER: USI Consultants

DESIGN ENGINEER: Crossroad Engineers

ESTIMATED PROJECT COSTS: \$400,000

- 80% federal funding
- 20% local match

PROJECT BENEFITS:

- Prolong the service life of the roadway
- Reduce traffic delays
- Improve commuter and pedestrian safety
- Increased economic development opportunities (jobs)

Project schedules and costs are subject to change.
